## About PRO Renovation and Design

At PRO Renovation and Design, we are your premier partner for exceptional home and commercial transformations. We apply rigorous systems thinking to the construction process, ensuring every project is predictable, high-quality, and built to last. Your project starts and ends with us — under our name, and on our word.

## Our Process

### Phase 1 — Initial Planning & Design

Every great project begins with data. We create a strategic plan that optimizes your layout while ensuring structural integrity. We do not start until the design logic is sound and every detail is confirmed.

- 3D design modeling — see the final result before any work begins
- Layout optimization for maximum functionality and flow
- Material selection with cost-benefit analysis
- Structural integrity review before breaking ground

### Phase 2 — Execution

- Demolition — safe, clean, and fully managed
- Custom cabinetry and millwork — precision installation of high-end units
- Flooring — complete supply and installation for all flooring types
- Premium countertops — flawless tile, quartz, granite, and marble installation
- Professional painting — multi-stage interior and exterior finishes
- Bathroom and kitchen renovation — full gut-to-finish remodels
- Outdoor projects — decks, patios, fencing, pergolas, and exterior upgrades

### Phase 3 — Final Systems Check & Handover

Before we hand over the keys, we perform a thorough systems check. We walk you through your newly renovated space and explain the maintenance logic so your home or business stays in peak condition for years to come.

## Service Catalog & Pricing

*All prices are estimates. A final quote is provided after a free on-site consultation.*
